

AI Barometer #13 — insufficient-coverage edition

Observation period (UTC): 2026-09-07 → 2026-09-13

This week, 10 of 12 systems were fully observed. Two feeds did not provide usable coverage. NeoMundi publishes the measured state without completing, masking, or extrapolating the missing data.

Status of the 12 systems

Profile	Status	Planned	Launched	Fully scored	Coverage
PROFILE-161CC5	measured	400	400	399	99.75%
PROFILE-212079	measured	400	400	396	99.00%
PROFILE-486F91	measured	400	400	397	99.25%
PROFILE-48C581	measured	400	400	400	100.00%
PROFILE-59664C	measured	400	400	398	99.50%
PROFILE-5A5C60	insufficient data	400	0	0	-
PROFILE-5B3BB7	measured	400	400	396	99.00%
PROFILE-638E26	measured	400	400	399	99.75%
PROFILE-739F7C	measured	400	400	400	100.00%
PROFILE-B912EA	measured	400	400	399	99.75%
PROFILE-DEA9C5	measured	400	400	397	99.25%
PROFILE-F5FF91	insufficient data	400	0	0	-

Real global coverage across the 12 expected systems: 82.9% (below the standard 90% publication threshold, unmodified). No global conclusion is presented in this edition.

Technical incident

/v1/govern/stream endpoint: both systems marked "insufficient data" returned 100% identical failures ("The /stream endpoint returned no LLM response text.") across 4 separate collection attempts, including after API credential rotation. Root cause unresolved at the time of this edition. See incident_report.json for the full factual record.

Comparability

NOT_COMPARABLE — no numeric comparison against Barometer #12 or any prior edition.

NeoMundi AI Barometer — exceptional edition, generated automatically from measured data.
